History: This message has been forwarded.

Barry, Ranei, Helen, Claire,

You all have a copy of the draft proposal now. As you will see in the proposal, we need some additional information in the people section.

I understand that it is nearly impossible for you to confirm your specific personnel participation in the joint regional guidance project right now. Nevertheless, the proposal requires we basically confirm that we will engage people who have the necessary background, expertise and experience within their agencies to get over the finish line with the work we've articulated in the grant.

Even if other personnel are assigned to direct participation in elements of the work ahead, I have a hard time imagining that you specifically will not be directly engaged for at least the formative stages of the work and probably in the review (though I am hopeful direct engagement throughout).

Please take a moment to craft a brief statement of your relevant background and experience in the agency with particular emphasis on your role in your agency's activities related to trading, trading guidance, or setting/reviewing a particular program or project.

As an example, See Bobby Cochran's bio below.

Bobby Cochran, Executive Director of the Willamette Partnership, will be responsible for the overall project coordination and will be the lead facilitator for the project activities in Tier I and Tier II . Bobby has led complex inter-agency processes around water quality trading and other environmental markets since 2007. Those processes have led to agency rule changes, shifts in standard operating procedures, and other forms of coordinated action. Bobby has nearly 10 years of experience negotiating collaborative policy at the intersection of science, policy, and economics. He has a PhD from Portland State specializing in public policy and negotiation, and an MA in Conflict Resolution.

Thanks

David Primozich
