NRCS CIG 2-21-12 730 AM.docx

Claire, Christine, Paula,

Please find the current draft of the NRCS CIG proposal. It has many authors so is a little choppy in places, but I think you will be able to understand the general approach we are proposing. This is draft, so language suggestions are appreciated. I just got off the phone with someone who said we buried all the exciting parts. That is true. We will brush it up for the final, but the content is what matters right now.

I hope this draft will enable you to write a letter of support and commitment to engage. I understand a commitment to staff will be hard for you in a time of contracting resources. We are hoping the grant will pay for .5 FTE for each of the state agencies for 3 years. I think it is fine to limit your letter to a commitment to participate, understanding we will need to work out the details if we get the grant, but the stronger you can make the letter the better.

Please look for a new summary document later this morning. Based on all the new language the summary needs to be updated.

Thank you for all your support and the time you took last week.

David Primozich

Director of Ecosystem Services
