Terrific. Thanks for taking time to plug in. I will use the magic of technology to complete the merge.

Subject: My comments on the Feb 21 draft CIG proposal

David,

Attached are comments I added to those already provided by Alan Henning and Ranae Nomura, so that I could see if I agreed with what they wrote, and to hopefully make it less confusing for you to merge all of these edits. However, I've added to the confusion by working on this document on my personal laptop that has an older version of Word, and then adding a few more comments once I got back to the office this morning, so I think it has two different sets of "CS" edits in track changes.

Feel free to call with questions about my edits and comments - I hope they make sense, but I did write most of them as I was flying back from Boston on a delayed flight so I will blame any incoherence on the fact it was actually midnight and even later (East Coast Time) when I made the edits.
