Hi all,

2 down, 2 to go. Attached are the "Options Memos" intended as materials for the first Interagency Workshop in April. There is one for Validation and the other combines Verification, Certification, and Registration.

Each memo introduces the program component/element, introduces trade offs lays out options, and a recommended default (where we have them as of last Tier 2 draft), or questions/considerations where we don't.

In addition to the usual linguistic edits, please keep the following in mind as you review:

- Is there enough context for participants to understand the role of this element?
- Have we presented enough options? The right options?
- Are the trade offs accurately and comprehensively covered? What additional information will folks need to understand this issue?

Looking for comments by Monday, 3/25 but earlier is better if you have them, we are trying to get finals to the group by 3/26 so they have 2 weeks to process before the workshop. The other 2 memos will hopefully find your inbox later today.

Thanks!
Carrie
