Subject: Lower Boise BMP documents
Attachments: carter2002bmps.PDF; GPfS_final(1).pdf; SCC technical documents.pdf; Summary of participant recommendations for a trading framework.pdf

I wasn't sure if you had seen all of these documents that were developed for the Lower Boise trading project all those years ago. If you think they would be useful, please share with the rest of the group. In any case, they resurfaced today when Scott Koberg of the Ada County SWCD gave a presentation today to the Lower Boise TAC (and Bill Stewart attended), to refresh their memories on what trading looked like when several of their members participated in the pilot project back then. Scott was one of the good team members and I'm glad he's back working in the county. He and I talked yesterday because he wanted to know what was happening currently, so I told him about this regional project and directed him to the WP website plus gave him some talking points.

FYI, one of the documents looks like it was updated from 1999 but that's just an annoying automated feature in Word since I know the author Dave Ferguson moved to Michigan or Ohio about ten years ago.
