Hi Claire,

Thank you for your feedback. I've been doing quite a bit of research to learn about the BMPs myself over the past several months. Frankly, some still baffle me, i.e. phytase feed additive. I can't say we'll teach you about them all, but we will dig into the ones the group decides to explore further.

Unfortunately, because some have already answered the survey, I can't modify it. We will definitely take note that folks will likely want to learn about many more BMPs. If and when this presents itself again, we may just resend out that specific survey question (without the limitations of course).

I don't think you missed much as the last page (page 3) just asked for name. I will remember to remove such requirements next time.

Thanks again,  
Sam

Sam,

I am interested in the survey but am still new enough to our TMDL unit that I don't know the answers to any of the questions, especially for nutrient and sediment control. Therefore I decided I shouldn't participate in the survey since I would just be guessing on my answers. I will defer to Bill and Dustan for EPA's answers to the questions. I am looking

forward to the discussion of the survey results (and I don't know what all the questions are because it wouldn't let me advance without putting in any answers).

Also, Bill wanted me to give you a comment that the question asking to identify the top 5 BMPs we want to know more about, should allow more than 5 BMPs to be listed. He has a lot more than that he wants to look at.

**Subject:** BMP Applicability Survey

Hi Folks,

As promised, below is a link to a survey so that we can get an idea from you all regarding your interest in specific BMPs. Our next meeting, June 24th, we will chat about the survey results and select a few BMPs to delve further into. This will include looking at the quality standards and quantification methods that will need to be defined for each BMP and thinking about what an approval process might look like.

[Click here for BMP Applicability Survey](#)

Please complete the survey by Friday, June 14th.

Let me know if you have any questions.

Thanks,

Sam
