I've heard from three people (half the group) so far – they are willing, so maybe that's enough of a quorum. Those who can't make it can call in. We will need a call-in # anyway because of Bill Stewart in Idaho and Bob Rose in Wash., DC.

Hi Claire,

Any word on ability to travel down to Lacey?

Carrie

I will check with my team but it may not work for us. That drive is a little over an hour going down but coming back will be much longer because of rush hour traffic around both Tacoma and Seattle (and the HOV lanes will be assigned to go the opposite direction, creating even more back-ups heading north). I will ask and get back to you as soon as I can.

Hi Claire,

That's great, we'd love to have Christine there.

I apologize for continuing the shake up the plans...but would you and other EPA staff be able to get down to hold the meeting in Lacey from 1-4 instead? Leaving Seattle at 4:30 and getting back to Portland at 8PM or later is turning out to be a tough proposition for ODEQ staff.

Thanks

Carrie

It turns out Christine is available that day, and I was able to reserve a large conference room as well. I will get a call-in # once it's confirmed for that day.

Hi Claire,

Can you please have folks hold Monday afternoon (1-4PM) on March 18th for a walk-through of the Medford permit. I know that we will lose Christine that day, but it was the only time that worked for ODEQ and Ecology.

I'm waiting to hear from TFT before a final confirmation, but I'll pass it along as soon as I can.

Best,

Carrie
