Subject: Are you available on March 18 to participate in the trading meeting?

Dave, Laurie & Ben,

On March 18, 1:30 – 4:30 pm, here in our building, there will be a meeting led by the Willamette Partnership and The Freshwater Trust, to learn about the details of the Medford temperature trade, and to answer questions and discuss any concerns we may have. Staff from Ecology, Oregon DEQ, & Idaho DEQ will also be there in person or on the phone. The purpose of the meeting is to find out what elements are good to use as our trade model going forward and what needs to be improved.

Your names came up specifically as suggested attendees from Melissa Gildersleeve and Helen Bresler at Ecology. They are very interested in this trade as an example of what they would like to be able to do in Washington, but want to hear what you (and others in EPA) think.

I have already invited members of the R10 water quality trading team I am working with, but I want others to be able to participate if they are interested, since it's such a great opportunity and is in our building. I will go ahead and add you as optional attendees in the calendar invitation, and please indicate if you are able to come by accepting or declining. The invitation has the draft agenda but more information will be available soon.
